Work Experience

Frontend Development Intern at Learn From Home

April'2020-May'2020

- Voluntarily helped a not-yet-funded start-up company to develop its website from scratch.
- Made the FAQ, contact us, connection, and help pages for the website.
- Collaborated with web designers to design, build, test, and improve the product.
- Ensured proper documentation and reports in all stages of development.
- Technologies Used: HTML5, CSS, Javascript, Bootstrap4.

Academic Projects

Hangman Game

Oct'2019

Ms. Nikita Tiwari, Computer Engineering Dept.

S.G.S.I.T.S., Indore

- Developed a command-line java-based Hangman game. The player has to correctly guess the hidden word by guessing the individual characters of the word.
- Designed an animated Hangman character whose body parts appear as the player makes the incorrect choice.
- Technology Used: Java, CLI

Technical Projects

AgriSmart

May'2020-Ongoing

- Designed a platform where farmers and transporters can connect to each other. The main aim of this is to include Truck pooling, to reduce carbon emission, and also increase the daily wages of the transporter.
- Responsible for making the frontend of the application with a team of 6 people.
- Has features of offline mode, local notifications, truck booking, etc.
- Technology Used: React Native

Text Editor

May'2020

- Built an editor which is having a feature of login and creating a new account.
- After a successful login, the user can see the list of all files created.
- Users can either open an existing file or can create a new file.
- Technology Used: Java Swing.

Simon Game

Dec' 2019

- It's a game to train short-term memory.
- The game has four colored buttons, each producing a particular tone when it is pressed.
- A round in the game consists of the site highlighting up one button in a random order, after which the player must reproduce that order by pressing the button. As the game progresses, the number of buttons to be pressed increases by one.
- Technology Used: HTML5, CSS, Bootstrap4, JavaScript
